

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

V. Halo *observatus* Romæ Anno M DCC XXXII.
 Die XI. Augusti à D. Did. de Revillas,
Regali Societati communicavit Tho. Dere-
 ham Bart.

AB horâ antè Meridiem tertia usque ad secundam
 post Meridiem simplex Halo undique terminatus,
 & graphicè circularis, solem in polo ejus existentem
 cingere visus est. Zonæ Latitudo apparentem solis
 diametrum æquare videbatur. Color intimus ruber,
 reliqui satis diluti, atque iis qui in Iride conspiciuntur
 analogi, sed in candorem desinentes, & circa Meri-
 diem aliquomodo immutati. Coelum quamvis fere-
 num, tenui caligine inficiebatur, Boreâ lenissimè
 flante. Caligo deindè in albicantes nubeculas den-
 sata, dum Halo evanuit, cujus Diameter ab interno
 Zonæ margine dimensa, erat 45 gr.

Altitudo Barometri eodem die.
